QUALITY and SERVICE

BUILT THIS BIG NURSERY

WE ARE THOROUGHLY ORGANIZED to properly plant, cultivate, mature, dig, pack and ship your trees with the greatest measure of satisfaction to you. Our department heads in office and field are experts in their line and stockholders in the Company, hence vitally interested in its permanent success.

OUR SYSTEM OF CHECKING and re-checking, both in the office and packing house, practically eliminates errors and the smallest of our 15,000 or more orders delivered annually receives the same conscientious care as the largest orchard order.

WE PACK CAREFULLY in paper-lined cases or in moisture retaining asphaltum lined burlap, using the best of packing material. Our large sale over a widely extended field enables us to consolidate car lots to distant points for local distribution, thus saving the delays incident to long local freight shipments. We guarantee stock to reach our customers anywhere in the United States or Canada in perfect condition.

OUR PACKING AND STORAGE HOUSE has room for many carloads of trees. It has frost-proof walls and roof, so that winter shipments to California and Arizona may continue uninterrupted, while late spring shipments to Montana and other northern sections go out in dormant condition even when held by request until trees outside are in full leaf.

OUR TREES ARE FREE FROM PEST OR DISEASE, due to our isolation on the Yakima Indian Reservation far from old orchards or forests.

INSPECTION. Every outgoing shipment bears the certificate of a deputy state inspector who is stationed at our packing house as provided under our rigid Washington law. The statutes of no other western state make this arrangement possible. We are regularly licensed and bonded in every state and province where we sell stock.

THE LOCATION OF OUR PLANT for the growing of clean, healthy, high-grade trees is unsurpassed. Our Yakima soil is new and rich. Long growing seasons, moisture under control, thorough, continuous cultivation and ideal fall weather for maturing stock, unhampered by late fall rains, enable us to deliver dormant trees, hardy and thoroughly ripened and possessing an unequaled root system.

THE WASHINGTON NURSERY COMPANY STANDS BACK OF EVERYTHING IT SELLS. A guarantee from a permanently established, responsible nursery means something. "Quality and Service" are the foundations of our success. We invite suggestions that will lead to improvement along any line.

WE PAY THE FREIGHT

YEARLING UNBRANCHED APPLE GRAFTS

Showing the entire root system developed in eight months
From Planting

These were carefully dug by spades and hand to save all of the long tender fibres, merely to demonstrate the fertility of our soil and the vigorous root growth produced, which in turn means sturdy, healthy trees. It is self-evident that we cannot deliver, nor could our customers successfully plant full length roots like that. All our trees are dug with a large eight to ten-horse digger, consisting of a heavy broad blade in "U" shape form about 24 inches wide by 20 inches deep, which cuts completely under the tree from both sides without marring or mutilating the roots and leaving on the tree a root system unobtainable by the old spade dug method.

SPECIAL NOTICE—We have salesmen representing us in almost every locality in the west who are prepared to furnish proper credentials. Occasionally an unprincipled individual has used the catalog of some prominent nursery in booking orders in his own name, supplying stock bought from unreliable sources. If our patrons will notify us of anyone whom they have reason to believe is not a regularly appointed salesman, we shall consider it a favor.

WE WANT MORE SALESMEN—Any persevering man can make money selling our superior stock. A number of our best salesmen are elderly men. Many a retired farmer succeeds splendidly. Homesteaders frequently are equipped with a horse and have the time to make a good canvass. Our force includes ladies, also school men on vacations, who thus make profitable use of their spare time.

WRITE FOR OUR SELLING PROPOSITION or tell us of some acquaintance locally or elsewhere who you think might be interested.

JAP PEAR AUG. 10TH

OUR JAP PEAR SEEDLINGS IN AUGUST.

We raise our own pear, apple, cherry and other seedlings on which we bud or graft the varieties we sell. This insures clean, vigorous roots and healthy bodies on our trees. We are the largest seedling growers west of Kansas and do an extensive wholesale business in this line.

WHAT OUR CUSTOMERS SAY

FROM ALABAMA.

They say those trees I got from you were the finest they ever saw come from a nursery. I got 5000 trees in Maryland. They were no such trees as you sent.—J. C. Scott, Elmore, Alabama.

FROM BRITISH COLUMBIA.

Every tree passed inspection splendidly and the inspector complimented me on it.—J. N. Kendall, Vancouver, B. C.

Many thanks for apple trees, which came to hand in first-class shape and are doing well.—N. Hansen, Quesnel, B. C.

I received the fruit trees in good order on the 18th. I am well pleased with them.—Michael O. Neill, Sardis, B. C.

Please accept my thanks for the parcel of fine Kings and Bartlett, which have duly arrived in excellent condition.—G. Hamilton Fulton, Port Haney, B. C.

FROM CALIFORNIA.

Trees are in excellent condition, and the inspector says are the best bunch of trees he has seen for a long time.—J. E. Sanders, Corning, Calif.

The trees have all reached here in fine condition. Those trees were pronounced by the horticultural commissioner the finest trees coming into this part of the country. One man said those pear trees were the best he ever seen.—Robt. A. Badger, Middletown, Calif.

We received the trees in good order, and are very much pleased with them.—F. H. Phelps, Blacksburg, Calif.

FROM IDAHO.

I find the trees in fine order and Mr. Kimball said they had the best roots he has seen.—C. J. Hansen, Payette, Ida.

Splendid trees. They are the best rooted trees in their sizes I ever saw. Can't be duplicated anywhere.—T. J. Marcum, Gooding, Idaho.

I want to thank you for the fine trees and plants you sent me. They are certainly very satisfactory.—Mrs. T. E. Buckingham, Gifford, Ida.

Received the trees, etc., from the Express Co. yesterday, and found them in good shape and I am well pleased with the stock.—James Berg, Gibbs, Ida.

FROM MONTANA.

The customers were well pleased with their stock.—Joel A. Moss, Missoula, Mont.

In all the twenty odd years I have handled nursery stock, I never opened a better lot.—C. H. Cobb, Great Falls, Mont.

FROM OREGON.

You ought to be here and hear the praise we are getting.—S. W. Heppner, Hood River, Ore.

(Continued on Page 23)

ENGLISH WALNUTS

**THOUSANDS OF YOUNG ENGLISH WALNUTS
IN OUR NURSERY.**

For many years California has led the United States in the production of English (Persian) Walnuts due to the early development of the industry through the more or less chance plantings by the pioneers of early days.

During this time farsighted nurserymen and orchardists of the northwest have been experimenting with and developing the best types for Western and Northwestern conditions. We recommend only the proven sorts.

THE VROOMAN FRANQUETTE

(See Cut Page 10)

We are growing and selling this famous nut under license from the Oregon Nursery Co., who have an exclusive propagating contract with the owners of the celebrated Vrooman Franquette Orchard at Santa Rosa, California.

THE VROOMAN FRANQUETTE is the one proven variety best suited to Northern climatic conditions as it combines the three prime essentials for a profitable walnut tree.

HARDINESS as a tree, withstanding temperatures as severe as 25 degrees below zero.

LATE BLOOMING,—escaping late frosts which kill the buds on most other varieties.

SELF POLLENIZING,—insuring a crop when many another variety fails.

The walnut industry is yet in its infancy. The United States imports millions of pounds annually. The average imports of nuts for ten years is greater in value than the exports of apples. The Franquette is a proven cropper in the Yakima Valley and in many other irrigated sections east of the Cascades, as well as on the Coast. It brings from 3c to 5c more per pound than other varieties as the nut is large, oval, medium thin shell, full of the finest flavored meat and remains perfectly sealed for an indefinite time. Nuts with a poor seal become rancid.

The Walnut is immune from most of the ills that affect other trees. Pruning and spraying are practically eliminated in all sections. There is no thinning expense and no harvesting expense, as in most sections, the nuts, when ripe, fall free from the hull. There is no waste. Nuts are not perishable like fruit. Cold storage is eliminated. Sack and store or sell them when you are ready.

Write for special walnut information, giving us particulars regarding soil, elevation, and climatic conditions.

WALNUTS

ENGLISH (Persian or French) AND JAPANESE

VROOMAN FRANQUETTE

(See Page 3)

This superior walnut is propagated from the celebrated Vrooman Franquette orchard at Santa Rosa, California. It combines the three prime essentials for the west. A hardy tree, late blooming and self pollinating.

The "second generation" trees are grown from nuts produced on the grafted Vrooman Franquette orchard which, not being cross-pollinated, reproduce true to type. We are growing and selling the Vrooman Franquette under license from the Oregon Nursery Company, which holds an exclusive propagating contract with the owners of the Vrooman orchard. Write for special walnut booklet.

Choice Two-Year Field Grown ROSES

NOT HOT-HOUSE GROWN

Do not confound our choice stock with the small tender hot-house plants offered by mail-order houses at cut prices. Such plants always prove a disappointment, besides if they do live one must wait two years before they bloom.

BLOOM THE FIRST SEASON

Our stock is hardy, field grown two-year stock, well rooted and will bloom the First Summer. It pays always to get the best.

Remember that our prices cover charges prepaid to destination. We pack carefully and no matter where you are situated the cost is no greater than if you purchased at our door.

All varieties not specially priced are 50c each, \$5.00 per dozen.

PINK

Anny Mueller. Poly. Brilliant pink.
 Belle Sebreicht H. T. Imperial pink.
 Betty, H. T. Coppery pink, shaded old gold.
 Dean Hole, H. T. Intense salmon pink.
 Hermosa, Bengal. Pink.
 Juliet, H. B. Old gold changing to deep pink, 75c each, \$7.50 per dozen.
 Joseph Hill, H. T. Salmon pink. 75c each, \$7.50 per dozen.
 Johnkeer J. L. Mock, H. T. Bright red, salmon pink.
 Killarney, H. T. Beautiful pink.
 La France, H. T. Delicate silvery rose pink.
 Mrs. John Laing, H. P. Delicate pink.
 My Maryland, H. T. Bright salmon pink.
 Mad. Abel Chatenay, H. T. Lovely carmine pink.
 Mad. Cecil Brunner, Poly. Salmon pink.
 M. C. Testout, H. T. Clear, satiny pink.
 Magna Charta, H. P. Bright rose pink.

**ONE OF OUR STRAWBERRY BLOCKS.**

Note the vigorous healthy plants and the length of roots on the new plant lying on the handkerchief. Nowhere can finer strawberry plants be produced than here.

We can supply most varieties we list for September planting in sections where moisture is obtainable to give the new plants a good start. If planted in September they will bear the next season.

WHAT OUR CUSTOMERS SAY

(Continued from Page 2)

FROM OREGON.

All customers well pleased so far. Must commend you on sending clean lot of stock, not a scrub in the entire lot.—F. C. Perry, Molalla, Ore.

Will be proud to deliver such good stock.—A. V. Kassebaum, Oswego, Ore.

I received the nursery stock, which was in fine condition.—J. H. Tucker, Unity, Ore.

FROM UTAH.

You sent very good stock and I am well pleased with my part of the order.—Geo. A. Davis, Salt Lake City, Utah.

(See next page)

A Difference of Three Seasons with this Toopenish Residence

(See Preceding Page)

The Massachusetts Forestry Association, for determining the value of shade trees on streets, asked a large number of practical real estate men this question: "How much do full-grown shade trees, along the street, improve the value of adjoining residence property?" The majority of answers lay between ten and fifty per cent, while the average was between twenty-five and forty per cent.

This means that residence property valued at \$2,000 would be enhanced in value by the use of shade trees from \$500 to \$800.

How much do ornamentals enhance the value of property?
Look at the adjoining pictures and decide for yourself how much the use of ornamental trees, shrubs, vines, roses, etc., enhanced the value of that property.

If these were different properties, lying side by side, and if you were ready to buy a home and could pay the price, how much more would you give for the one that is thus beautified?
